

## **County Emergency Resources**

In an effort to keep all Gloucester County residents, school districts and municipalities informed during an emergency and to help stop a potential crisis before it begins, the County has created the GloucesterAlert system.

The GloucesterAlert system allows residents to receive a text message either on their email account (work, home, other), cell phone, text pager, Blackberry or Wireless PDA (Palm, iPAQ, etc.). Gloucester County's Office of Emergency Response is responsible for delivering messages on the system that pertain to traffic, weather and county events, while participating school districts and municipalities that utilize the system are responsible for administering their messages.

Any resident interested in receiving this service should log on to [www.gloucesteralert.com](http://www.gloucesteralert.com) and follow the simple steps to choose the devices on which to be notified and the types of notification that they choose to receive.

In addition, all Gloucester residents can call County 211 Call For Help a toll-free community resource providing current information on unlimited types of issues and referral to available services within Gloucester County and statewide.
